Discloses performance against long term reduction targets	Yes
Names director responsible for energy use	Yes
Engages employees in reduction of energy use	No
<p><b>Report comments:</b> The Isle of Wight Council has recently published its second Carbon Management Plan (CMP) for the period 2010-15, prepared with support from the Carbon Trust. The CMP sets a target of 6% annual reductions in carbon emissions (30% over the period of the plan) from its buildings and services. The bulk of the reductions will be achieved through improving the energy performance of buildings and by reducing the number of buildings from which the council operates. The installation of smart meters in corporate buildings and schools is planned for 2011/12 and a major behaviour change initiative will start in Autumn 2011.</p>
