<b>Persons</b>	<b>477</b>	<b>1,189</b>	<b>1,666</b>	<b>28.6%</b>
<b>% of total</b>	<b>29%</b>	<b>71%</b>	<b>100%</b>	

## COMMENTARY

The data above presents data about deaths of IW residents which were registered in 2007 , as an example of the profile of IW deaths by age and gender.

The data and charts, **top**, show that:

- More males than females die overall and in the younger age groups; more females die in the 85+ age group, reflecting their longer life expectancy.

The data and charts, **below**, show deaths among age groups under-75 and over-75, 75 being the age below which death is regarded as 'premature'. This data shows that:

- 29% of deaths in 2007 were 'premature'.  
- More males than females died 'prematurely'.

## INDICATOR DEFINITION

<b>Indicator:</b>	Main Causes of Death
<b>Definition:</b>	Deaths registered - by gender and age
<b>Numerator (number of people or events)</b>	Number of deaths of people resident in the specified area which were registered in the specified years.
<b>Denominator (total population or events)</b>	Resident population for the specified years. All Ages by Gender
<b>Geographic Coverage</b>	Local Authority
<b>Time period</b>	2007
<b>Data Source(s)</b>	Office for National Statistics: Vital Statistics Tables (NHS version)
<b>Significance for Health</b>	
<b>Factors that might affect the Accuracy of this Indicator</b>
