

2011 Census: Percentage of household returns made by internet in England and Wales

This spreadsheet shows the percentage of household questionnaires returned by internet for the 2011 Census in England and Wales. This information has been produced using provisional results (August 2011) before full validation of Census responses is complete.

Internet returns are shown for the following levels of geography: Region, Local Authority District (LAD), as well as Ward and Lower Layer Super Output Area (LSOA) for the Isle of Wight. This data has been sorted into descending order, showing the areas with the highest percentage of internet returns first .

The data for Ward level has been compiled using a best fit Output Area (Jan 2010) to Electoral Ward / Division (Dec 2010) look up. As a result some Wards may not appear in the data.

More information on this can be obtained from the Office for National Statistics website (2011 Census update and evaluation reports) - [click here to view](#).
