

## 2011 Census - First Release

The following pages provide copies of a range of outcomes taken from the first release of information for the 2011 Census.

The release includes a limited number of datasets that offer a picture to the numbers and age groups for people on the Isle of Wight and include:

- Usual Residents and number of households
- Age-sex population distributions
- Age-sex population proportions

The figures given are described as 'an estimate' having been moderated by the Office for National Statistics to provide as accurate a set of figures as possible. As such this first set of quality assured results should be taken as indicative figures for population, and since they are rounded to the nearest hundred, slight differences may occur where different groups are totalled.

Subsequent releases, it is advised, will include results that have not been rounded.

Further information on this, and future 2011 Census releases are available from the Office for National Statistics (ONS) 2011 Census homepage

### Census estimate of usual residents

|  | Isle of Wight | South East | England and Wales |
|--|---------------|------------|-------------------|
| Census count of usual residents                  | 131,400       | 8,190,300  | 52,638,800        |
| Census estimate of usual residents - All persons | 138,300       | 8,634,800  | 56,075,900        |
| Males  | 67,400        | 4,239,300  | 27,573,400        |
| Females  | 70,800        | 4,395,500  | 28,502,500        |
